No jumping.

Gamemechanics are nice. Sometimes it seems as if the hitboxes are a bit off.

Story - what story?

Graphics are fluid even on weak machines.

Sound - so so.. When I saw there was no way to jump, I knew this was another mobile game port.

The graphics were laggy, and occasionally the game locks up while your playing.

. For a small price it's pretty good, impact is fine.. Wonderful! I felt extremely immersed in the gameplay. I enjoy it so far and will continue to enjoy it. Recommend! 8V10. A simple little indie shooter that packs a huge punch, 4 player multiplayer; online, LAN and against bots which is awesome, an awesome campaign that reminds me of System Shock 2. And the graphics are amazing. Overall a cheap shooter that doesn't dissapoint in any way.

That atomic cannon though(thats what I call it) is so satisfying to shoot, and that kick\u2665\u2665\u2665\u2665\u2665soundtrack, just perfect

Awesome job guys this game doesn't dissapoint me a single bit. a cute little game that i wish was a lot longer. The twin of quake 3 arena.

The another best arena shooter ever for mobile i play it countless hour!!!! in IOS in Botmatchs with offer infinite replay value like well-known arena shooter like Quake 3 arena Unreal tournament.It pc version with well optimized graphic and better control.Becuase both campaign and botmatchs it avialable offline too!!!! so this enjoyed anywhere anytime as much as i want as long as battery is charged(Moblie version or play in laptop) Caution!!! don't play while charging it may explode your mobile phone or tablet :)

SomeSuggestion:

1.Add more weapon the most wish is railgun

2.Adjustable bots difficultly and frag limit time limit

3.Replayable mission with adjustable difficultly (If you want to replay you must delete your slot and start form begining is)

Who said this game is boring they wrong i play in moblie for 1 year already until now

****Don't ever ask me Neon shadow or quake 3 arena is better i will be mad cause is really tough question ever calculus for enginner is much easier than this question****. Es simple disparar lo que se mueva mientras pasas niveles casi iguales, el online no funciona. straight forward no nonsense ... This game is not quite as described. It is old school, yes, but not because it's cool like doom, quake or unreal. It's because the designers were too lazy to do anything with this game. Yes, everything about this game is "dumbed down," even the settings page lacks basic setup items. There is no "jump" key, which is ASTOUNDING. The

levels are repetitive in the extreme, featuring a monotonous array of foes, varying in size and hit points. The weapons are some of the worst ever to be featured in a FPS. The multiplayer levels are a joke, as are the online "deathmatches" during which 3 people all called "player" proceed to stand around like manequin dummies. AVOID.

Old school FPS style. Nothing more nothing less. For what it is and how much I paid it is great. Very simple minless og fps fun.. I didn't like Neon Shadow when I first bought it, but it's growing on me. It's a fun little FPS, with simple mechanics and a challenge that comes from sustained reflex (saves happen at the start of the level, and nowhere else). I recommend.. A short and sweet oldschool action with newschool graphics.. Not bad.

But also not fun.. cool little shooter that is fun but only takes around an hour tops to complete. The devs did fairly well on capturing the doom feel but putting it into a more modernised universe. my only critisim, is that when i beat the boss, nothing happened, the pillar in the middle just span. completing it again, i got the acctual ending.. straight forward no nonsense ... Short campaign, decent story, Old school feel but new school graphics, feels kinda Cyberpunk

Multiplayer is dead and I only played one match and it was on mobile... Luckily, there are LAN and bot matches available but the only thing you can customise is The map and number of players...

Should you pick it up? I think so, but get it on sale, I dont find it worth recommending at 5 buckarroos. It's a good mindless Wolfenstein 3D level fun. There are a couple things that would make it better, though. One is making a checkpoint when you destroy the core, it's essentially half of the level completed. The other one is significantly reducing weapon change animation timeout. Changing to shotgun takes what, two seconds? That's too slow in the middle of a fight when you need to change weapon quickly for different enemies.
